PROFESSIONAL SUMMARY

Entry-Level Data Analyst (BE, 2025) with hands-on experience in data cleaning, transformation, and analysis using SQL, Excel, and Python (Pandas, NumPy), and dashboard development in Power BI. Completed three end-to-end analytics projects and a Data Analyst internship. Seeking an entry-level Data Analyst role to turn complex data into actionable business insights.

TECHNICAL SKILLS

- **Data Analysis:** Data Analysis, Statistical Analysis, Descriptive Statistics, Exploratory Data Analysis (EDA)
- **Data Preparation:** Data Collection, Data Cleaning, Data Transformation, Data Aggregation (Pandas, NumPy)
- **Business Intelligence & Visualization:** Power BI, Data Visualization, Dashboard Development
- **Languages & Tools:** SQL (SQL Server, SSMS), Python (Pandas, NumPy, Matplotlib), Excel (Pivot Tables, VLOOKUP)
- **Other:** Git/GitHub, MS Office, Google Sheets, basic Machine Learning (Scikit-learn)

EXPERIENCE

Data Analyst Intern – Wellbridge Global Solutions *Sep 2026 – Present*

Bengaluru, Karnataka | Remote, Part-time, Internship

- Collect, clean, and prepare business datasets using SQL, Excel, and Python (Pandas) to ensure accurate, analysis-ready data.
- Perform exploratory data analysis to identify trends, patterns, and anomalies, and summarize findings for the team.
- Build reports and Power BI dashboards that track key metrics and support data-driven decision-making.

JOB SIMULATION

GenAI Powered Data Analytics Job Simulation – Forage *Sep 2026*

- Exploratory data analysis and risk profiling
- Predicting delinquency with AI
- Business report and data storytelling for collections strategy
- Implementing an AI-driven collections strategy

PROJECTS

Customer Shopping Behavior Analysis *Sep 2026*

Tools: Python (Pandas), SQL Server, Power BI, Excel

- Analyzed 3,900 customer purchase records (18 attributes) to understand spending patterns, product preferences, discount usage, and subscription behavior.
- Cleaned and prepared the data in Python (Pandas) by handling missing values, standardizing columns, and engineering new features, then loaded it into SQL Server.
- Wrote SQL queries to measure revenue by customer segment, product performance, repeat customers, and age-group revenue.
- Built an interactive Power BI dashboard and presented findings with business recommendations in a project report and slide deck.

Healthcare Risk Stratification Analysis *Aug 2026*

Tools: SQL Server (SSMS), Python (Pandas, NumPy, Matplotlib), Excel, Git/GitHub

- Designed a four-table relational database (Patients, Diagnosis, Outcomes, Labs) in SQL Server with foreign-key integrity to track clinical outcomes and treatment costs.
- Used SQL to flag abnormal lab values (cholesterol, blood sugar, hemoglobin), rank diagnoses by treatment cost, and identify high-risk patients aged over 65.
- Performed exploratory analysis in Python (Pandas, Matplotlib), validated results with Excel pivot tables, and documented the project on GitHub.

Zepto SQL Data Analysis *Jul 2026*

Tools: SQL Server (SSMS), SQL

- Imported and explored Zepto product data in SQL Server, checking for NULL values, duplicate products, and stock availability.
- Cleaned the data by removing zero-MRP records and converting prices from paise to rupees.
- Answered business questions with SQL: highest-discount products, high-MRP out-of-stock items, estimated revenue and average discount by category, and best value by price per gram.

EDUCATION

Bachelor of Engineering (BE) in Information Technology *2021 – 2025*

MCT Rajiv Gandhi Institute of Technology, Mumbai | CGPA: 7.75 / 10

Class XII – Maharashtra State Board *2020 – 2021*

Percentage: 91%

Class X – Maharishi Vidya Mandir (CBSE) *2018 – 2019*

Percentage: 87.4%

CERTIFICATIONS

- Data Analytics Course – TuteDude *Sep 2026*
- AI-Data Engineering Analyst – Skill India *Sep 2026*
- SQL for Data Analysis – Simplilearn *Sep 2026*
- Power BI for Beginners – Simplilearn *Sep 2026*
- Programming with Python – Internshala Trainings *April 2023*
